

To Whom It May Concern ,

Hawco Products Ltd would like to recognize their satisfaction in dealing with Advanced Office Solutions and Xerox for many years. We have been extremely satisfied with our products and support during this time.

Hawco Products formulates and blends chemical products for institutional and industrial applications; our product and our brand image are of the utmost importance. We enjoy having full control of our image, which is why we turn to Xerox to provide the equipment to print our labels for our products.

Recently, we upgraded to a WorkCentre 7655 Copier/Printer replacing our previous WorkCentre M24. Though the WorkCentre M24 was a great machine for us, the WorkCentre 7655 has been exceptional! The colour quality, consistency, and sharpness are second to none. The WorkCentre 7655 was an easy choice in the market due to the SmartKit components, high level of productivity, ease of use and the ability to support Canadian manufacturing during these tough times. When service is required, the technicians in the Brantford area are very quick to respond, are helpful, and fix the problem right the first time.

We would highly recommend working with Steven Foglietta, Advanced Office Solutions and Xerox.

Yours truly,
